Standard specifications of the product are as follows:

Fifteen feet (15') of 1/8 Preformed Galvanized Steel Cable, black vinyl coated to 1/4" OD.

Two (2) alert signs ("Lane Closed") measuring 9" x 12", drilled and sleeved for hanging. Constructed of .04 aluminum panel with engineered grade reflective sheeting for background.

Two (2) metallic compression sleeves used in the closed end loop design and construction.

Standard package is three (3) complete units per box.

Modification consideration:

Standard product may be modified for cable length and quantity of alert panels per unit as specified by end user. Call for special pricing.

Instructions for Use:

Adjust alert panel(s) to desired position by sliding along cable.

Affix closed loop ends to structure and secure, being certain that reflective text is directed at on-coming traffic.
